# Introduction

## What is a Trust?

A Trust is a legal arrangement where one party (the Trustee) holds and manages assets on behalf of another (the beneficiary). They do this in line with specific terms set by the person creating the Trust (the settlor).

## The benefits of using a Trust

What could happen when someone passes away?

## What Trusts are available from Chesnara Life?

There are different kinds of Trust to choose from:

### Gift Trusts

**A Gift Trust is a way to give money or assets away to your chosen beneficiaries.** Once you place the gift in a Trust, it's no longer part of your estate for Inheritance Tax purposes — as long as you live for seven years after making the gift.

### Discounted Gift Trust

**A Discounted Gift Trust lets you put a sum of money into a Trust, and you receive regular payments back from it during your lifetime.** The 'discount' is part of your gift, and it's not considered for tax because you'll receive it back as income.

### Loan Trusts

**Loan Trusts are a way to invest your money where the growth won't be included in your estate.** You will receive regular loan repayments during your lifetime to supplement income, and the loan can be paid back to you at any time.
